

**LIST OF MILLS POTENTIALLY CONNECTED TO L'ORÉAL'S  
PALM-BASED OLEODERIVATIVES SUPPLY CHAIN IN 2022**

*TOP 90% OF 2022 VOLUMES*

As a cosmetic manufacturer, L'Oréal uses annually 284 tons of palm oil each year (from the pulp of the palm fruit). L'Oréal also purchases palm derivatives, in a quantity equivalent to approximately 88,156 tons of palm oil and palm kernel oil (extracted from the kernel of the palm fruit), from its suppliers – surfactants and oleochemicals manufacturers. These manufacturers source directly or indirectly from other manufacturers, traders, primary and secondary refiners and crushing plants, which are potentially connected to thousands of mills on the ground, which makes the palm derivatives supply chain singularly complex. Every year, L'Oréal – via consultations with direct and indirect suppliers carried out by an independent third party – conducts an in-depth investigation of its supply chain in order to map out its sourcing areas.

The list of 1,009 mills disclosed below, potentially connected to L'Oréal's top 90% volumes of palm-based oleoderivatives, results from the 2022 supply chain mapping work. These mills are located mainly in Indonesia (77.5%) and Malaysia (21.5%), which are the main sourcing areas, followed by Thailand, Papua New Guinea and Guatemala representing together 0.95%. At the province level, the mapping showed that L'Oréal's top 90% volumes originate from 44 provinces, with the top 5 provinces being: Jambi (20%), Riau (19%), North Sumatra (9%), Sabah (8%) and Central Kalimantan (7.5%).

The identification of the provenance of our sources provides L'Oréal with the basis for a preliminary risk assessment, for field-level verification and most of all for engaging with its direct and indirect suppliers towards ensuring compliance with [L'Oréal's Forest Policy](#) in line with No Deforestation, No Peat, No Exploitation principles.

The complementary list of mills potentially connected to L'Oréal's remaining 10% of volumes is available [upon request](#). In total, it covers 2,026 mills located in 26 countries including Indonesia and Malaysia. More particularly, L'Oréal sources from Thailand, Papua New Guinea, Guatemala, Colombia, Costa Rica, Honduras, Gabon, Ivory Coast, Solomon Islands, Cambodia, Brazil, Nicaragua, Panama, Ecuador, India, Nigeria, Liberia, Philippines, Ghana, Sierra Leone, Mexico, Peru, Cameroon and Venezuela, each country representing less than 0.8% of L'Oréal's volumes of palm-based oleoderivatives in 2022. Those mills and sourcing origins have a much lower probability of being connected to L'Oréal's supply chain.
